Full-Automatic Dough Sheeter

Main Characteristic

- It is suitable for croissants, Hand tearing bread, egg tarts, wife cakes, thousand-layer cakes and other kinds of pastry foods, and can also be used for rolling dough.
- Fully automatic design, PLC control panel, can save 9999 groups of formula memory data. The operation is simpler and more convenient, saves manpower, and is more efficient.
- Automatically adjust the thickness of the pressing surface, which is more accurate than manual operation. The thinnest layer can be evenly rolled to 1mm.
- You can set how many times a piece of dough is pressed, how much is pressed each time, and which time to sprinkle flour on the dough automatically.
- It is made of stainless steel and equipped with automatic dusting and automatic surface rolling device. Different sizes and materials can be customized according to customer requirements.
